Papers are invited from academics, researchers and practitioners working for a track dedicated of the Management Information System (MIS). The conference provides a forum for networking and to present and discuss contemporary issues and developments in the field.

Theoretical or practical contributions on any topic related to the management information system will be considered but those papers that conform to the trend of future information system will be particularly welcome.

The following is a suggested list of suitable topics:

Decision support system	Information Technology / E-Supply
Benchmarking	Knowledge Management
Collaborative Planning & Forecasting	Electronic mail and work
Customer-Driven MIS	Marketing of MIS product
Customer Relationship Management	Sustainability of MIS
Supplier Relationship Management	Decision planning
Human Factors	Modelling & Simulation
Enterprise Ressource Planning	Purchasing & Supplier Development
Expertise	MIS and Risk
Transport Operations	Green MIS
Performance Measurement	Supply Chains and MIS
Lean & Agile MIS	MIS Education & Training
